

PEACE LOVE .ME

TUTORING : I love to work one-on-one with students throughout the semester to help them with Trigonometry, Algebra, Calculus, Geometry, Statistics and Probability, writing, humanities, English, Spanish, and French. My minor was in Mathematics and I have past experience working for the University of Michigan Student Tutoring Center. Whether you need help with a single, vexing problem or comprehensive, semester-long tutoring, you have found your salvation.

EDITING : Tom Kuptz can bring your written work up to a level where you can be confident in presenting it for publication or even just to your Professor for a solid A.

WRITING : Tom Kuptz is not a ghostwriter, nor will he do your homework for you, but he is an accomplished writer in creative fiction and writing in the humanities. I can assist you with your work (even poetry!) or join you as a co-author if that's an option.

BUSINESS PLANNING : Thinking of launching a new business? Or turning around a stagnating business? Tom Kuptz is an experienced entrepreneur with multiple, successful launches and can help you write a business plan or a marketing plan. I can help you perform research in industries or seek out funding sources. If you are planning to engage in crowdfunding, my skills and experience will surely make your endeavor successful.

PRODUCT DEVELOPMENT : Building a prototype? Interested in 3-D printing or manufacturing-on-demand? Tom Kuptz can help you bring your product to fruition. I have particular experience in cosmetics and nutrition supplements, but also training in mechanical engineering. My first bachelor degree (from Baker College) was in Mechanical Engineering.

PUBLISHING : If you are trying to get a book published, you should be aware of all of your options, including finding an agent, self-publishing, and electronic distribution through a platform such as Amazon Kindle. I can assist you in getting your book into print, formatting for e-readers, even marketing and publicity.
